

## CB-OBWF SERIES

## CURVED BLADE GRILLES - WIDE FLANGE

**CB1OBWF** – one way  
**CB2OBWF** – two way

**CB2COBWF** – Corner Blow

**CB3OBWF** – 3 way  
**CB4OBWF** – 4 way

**DESIGN:** Grillmaster's CBW Series provide a WIDE FLANGE unit having an infinite choice of air discharge patterns by means of individually adjustable blades. Furnished in several configurations. Key operated blade dampers for precise volume adjustment.

**FEATURES:** CORNER KEY construction ensures tightly closed mitre. Heavy, deep blades impart sufficient direction to leaving air stream. Blades held in place by NYLON BUSHINGS, offering easy, yet secure adjustment. Grille body has CORNER CLIPS to prevent spreading. Unit completely assembled by mechanical means instead of conventional welding methods. Exclusive opposed blade dampers allow precise, accurate settings.

**CONSTRUCTION:** Constructed entirely of aluminum extrusions throughout. .050" frame thickness. Natural aluminum, satin finish. Can be painted, if desired, without priming.

**APPLICATION:** Designed primarily for ceiling application, where both precise air patterns and volume control are required. Wide flange ideal for fibre glass duct installations.
