

# RN-PT/SN-PT SERIES PERFORATED FACE DIFFUSER

LAY-IN 24 x 24 PANEL SIZE

[Other Panel Sizes Available]

MODEL RN-PT SHOWN

**DESIGN:**

The RN-PT (round neck) and the SN-PT (square neck) is designed to provide efficient air distribution for grid type ceiling application.

**FEATURES:**

Adjustable air pattern deflectors built in to provide "on the job" flexibility, enabling you to select desired air pattern - (factory set at four way deflection.)

Air pattern change will not affect static pressure, which remains constant.

Concealed tension spring allows for easy removal of perforated face.

Model OB damper for SN-PT and Model "D" Damper for RN-PT are available.

\*Matching return models RN-PT-R/SN-PT-R available.

Other panel sizes available.

**CONSTRUCTION:** .050 nominal extruded aluminum frame.

Unique corner key construction to ensure closed miters.

Steel perforated panel with 3/16" diameter holes on 1/4" staggered centers.

Furnished in off-white baked enamel.
