

S4 SERIES

DOUBLE DEFLECTION GRILLES

S4V Vertical face blades, horizontal rear blades.

S4H Horizontal face blades, vertical rear blades.

DESIGN: Grillmaster's S4 Series provides double deflection air patterns by means of streamlined, 5/8" deep, individually adjustable blades on 3/4" centers.

FEATURES: CORNER KEY construction ensures tightly closed mitre. Heavy, tempered blades of teardrop design.

Rear blades held securely at predetermined settings by NYLON BUSHINGS.

Grille body has CORNER CLIPS to prevent spreading.

Unit features complete assembly by mechanical means instead of conventional welding methods.

CONSTRUCTION: Constructed entirely of aluminum extrusions throughout. .050" frame thickness. Anodized finish. Can be painted, if desired, without priming.

APPLICATION: Designed primarily for high and low sidewall application, where volume control is not required.
